Art Unit: 3764

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tracy in view of Harker.

Tracy discloses a device comprising: a hook unit, with extension unit (23) on a bottom end a setting hole in the middle of the extension unit, a cone shaped taper/plug unit (28) further comprising a stopper (33) on top and a flexible tube 12, said tube having a hole.

In regard to claim 2 note fig. 2.

In regard to claim 3 note the radius of element (33) of Tracy.

Tracy however fails to disclose his device wherein his flexible tube member is manufactured of resilient rubber.

Harker however teaches manufacturing resilient tubing of resilient rubber (see col. 3, lines 64-65).

Given the teachings of Harker the examiner notes that to manufacture the cord member of Tracy of rubber would have been an obvious material selection in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Note the hook and extension arrangement (3) of Lacore et al.

Note the plug (20) and elastic cord member (12) of Block.
